

K-Love is a radio station in my area. They serve the local community by providing timely announcements of local events and providing a positive voice in the community. If this radio station were to be replaced by one with other programming, I believe it would be detrimental because then the positive message they provide might be replaced with negative messages not in the best interest of the community. The public interest is served by K-Love because it provides a family oriented, positive atmosphere free from filthy, obscene and vulgar language that is destructive to the family.
